

HIGH AUTHENTICITY RISK

Automated risk assessment for 0APCJNS8FF.jpg.
Recommended action: Manual review required before taking action on this media.
Evidence-Weighted Risk Score

88.5%

 **AI Forensic Summary** (summarization of detector signals only — not an authenticity verdict)
Analysis of the JPEG image reveals a resolution of 256x256 pixels with no EXIF metadata present. The image manipulation model detected strong signals suggesting the media is fake, contributing to an overall high risk rating.

Detector Signals & Evidence Breakdown

Signal Label	Risk Score	Weight	Technical Detail
File inspection	0%	0.1	image/jpeg · 27.8 KB · SHA-256: 69056cfc81fe24c8b9...
Image metadata inspection	N/A	0	Format: JPEG · 256×256px · EXIF: Absent
Image manipulation model	98%	0.9	Fake (98.35%)

Model Attention Heatmap (GradCAM)

Red and yellow regions highlight visual areas that most influenced the prediction.
