

LOW AUTHENTICITY RISK

Automated risk assessment for 1 (1090).jpg.

Recommended action: No elevated automated signal; this is not verification of authenticity.

Evidence-Weighted Risk Score

0%

AI Forensic Summary (summarization of detector signals only — not an authenticity verdict)

Analysis of the JPEG image indicates that EXIF metadata is absent. The image manipulation model detected no signs of alteration, evaluating the visual content as authentic. Overall, the available detector signals suggest a low risk of synthetic generation or manipulation.

Detector Signals & Evidence Breakdown

| Signal Label              | Risk Score | Weight | Technical Detail                                      |
|---------------------------|------------|--------|-------------------------------------------------------|
| File inspection           | 0%         | 0.1    | image/jpeg · 29.1 KB · SHA-256: 4c53e288442fd62bdb... |
| Image metadata inspection | N/A        | 0      | Format: JPEG · 500×750px · EXIF: Absent               |
| Image manipulation model  | 0%         | 0.9    | Real (100.00%)                                        |
